KOMODO - 1000

CONNECTING HOMES, SMALL AND MEDIUM SIZED ENTERPRISE

Why use an old EAPBX system when you can get the latest SIP based system for the same price?

KOMODO-1000 adds value to your home and business connecting you using the latest SIP technology. Why compromise on audio calling when you can get video calling for the same price? Talk to your family and friends using the video calling functionality.

KOMODO-1000 can serve up to 1000 users at any given time. It is compatible with most major brands of SIP enabled phones such as GenXfone, Cisco, Samsung, Grandstream, Amroad and many other brands.

Worried about poor video quality?

We use the best quality H.264 video codec which provides HD like video quality. Do not believe us? Try it for yourself. Ask a sales representative for a demo.

Calling other landlines and mobile phones

Calling other landlines and mobile phones which are not on the same network is a piece of cake. With our Enterprise Solution GenXvoip Komodo-1000 ESi servers, you can now make calls to landlines and mobile phones easily. The Komodo-1000ESi servers are manufactured in the UK to match stringent quality standards. By adding a small sum of money, you can upgrade your Komodo-1000 to Komodo-1000ESi which allows you make and receive calls to/from any phone in the world. So no more hassles of having an additional telephony line along with your existing EAPBX system to make outgoing calls. You can also assign incoming numbers to each and every extension^.
